SIMPLYGIVING SOFTWARE DEVELOPER

About the Role

We're seeking a dynamic and driven Full Stack Software Developer to join our team and help grow the world of giving!

Are you a creative team player that is dedicated and hard-working? Do you exhibit a genuine interest in software development and takes pride in your work?

We're looking for someone that is willing to learn and implement new technologies and work cohesively within a team environment that consists of both development and non-development staff. You should already have a foundation and passion in web technologies and have the desire to further your understanding and experience by building a world-class technology solution.

Job Function

Software Development:

- Participate in the system development life cycle including requirement gathering, analysis, design, development, testing, implementation and support.
- Develop, enhance and maintaining the system.
- Strong troubleshooting skills to diagnose issues or bugs.
- Prepare and maintain functional specification document.
- Software deployment and after go live support.
- Code review and code refactoring as standard development practise.

Strategy and Planning:

- Provide estimates of level of effort required in completing software development tasks.
- Provide ideas for implementation and functionality.

Research:

- Identify and research technologies to address software enhancements or fixes.
- Troubleshoot issues and bugs identified in the system.

Technical Support and Training

- Demo, train and handover relevant knowledge to other members of the development team.

- Demo and train non- development staff in new functionality implemented on the platform.
- Effectively communicate issues and solutions to technical support staff.
- Provide guidance and support to junior development staff.

Requirements

- University graduate in a relevant degree with 2+ years software development experience.
- Proficient in ASP.Net MVC, C#.Net, HTML, JavaScript, JQuery and CSS frameworks.
- Proficient in relational database, Microsoft SQL Server.
- Experience using Amazon Web Services (AWS).
- Experience in API development.
- Ability to work independently or within a team.
- Good written and spoken communication skills in English.
- Fresh graduates are encouraged to apply.

The above are non-negotiable
